⚠ WARNING [EN]
For climbing and mountaineering only. Climbing and mountaineering are dangerous. Understand and accept the risks involved before participating. Minors and others not able to assess this responsibility must be under the direct control of an experienced and responsible person. You are responsible for your own actions and decisions. Before using this product, read and understand all instructions and warnings that accompany it and familiarize yourself with its proper use, capabilities and limitations. Seek qualified instruction. Contact Black Diamond if you are uncertain about how to use this product. Do not modify this product in any way. Failure to read and follow these warnings can result in severe injury or death!

KEY:

- Risk of serious injury or death
- Approved use
- Risk of accident or injury
- Examination required

INSTRUCTIONS FOR USE LEASHES

The Android, Lockdown and Slider Leashes are rated to 2 kN and intended for self-belay only. The Slinger and Spinner Leashes are intended to prevent a dropped tool only, and not intended to support body weight.

Warning: In the event of a shock load, your leash will not stretch. Even a short fall onto a leash can injure you and can potentially cause your leash or your placement to fail, resulting in serious injury or death. (See accompanying illustrations)

CARE AND MAINTENANCE

Climbing gear must not come into contact with corrosive materials, such as battery acid, batter fumes, solvents, chlorine bleach, antifreeze, isopropyl alcohol or gasoline.

After contact with saltwater or salt air, always rinse and dry textile products and rinse, dry and lubricate metal products.

(See accompanying illustrations)

INSPECTION, RETIREMENT AND LIFESPAN

Climbing gear does not last forever. Inspect your gear before and after each use, and retire it when it fails inspection or when it reaches its maximum lifespan, 10 years after the date of manufacture for plastic or textile products/components, even if unused and properly stored. The lifespan of metal gear is not limited by age.

See the accompanying inspection illustrations. Retire immediately if any of the illustrated conditions are found.

• Damage and extreme conditions may shorten your equipment's useful life, and could conceivably require retiring the gear during its first use.

• Inspect your gear immediately whenever you suspect damage during use.

• Additional factors that may reduce the useful life of climbing gear: Falls, gear dropped from height, abrasion, wear, rust, corrosion, and prolonged exposure to sunlight, salt waterair, harsh environments or extreme temperatures.

• If you have any doubts about the dependability of your gear, or after a gear failure, return it for repair.

• Destroy retail gear to prevent future use.

• The lifespan of gear is measured from the date of manufacture, not the date of sale. Refer to the markings section of these instructions in order to determine the date of manufacture of this equipment. (See accompanying illustrations)

STORAGE AND TRANSPORTATION

(See accompanying illustrations)

LIMITED WARRANTY

For one year following purchase unless otherwise indicated by law, we will warrant to the original retail buyer only that our products are free from defects in material and workmanship as originally sold. If you receive a defective product, return it to us and we will replace it subject to the following conditions: We do not warrant products which show normal wear and tear or that have been used or maintained improperly, modified or altered, or damaged in any manner.

AVERTISSEMENT [FR]

Pour l'escalade et l'alpinisme uniquement. L'escalade et l'alpinisme sont des activités dangereuses. Vous devez comprendre et accepter les risques encourus avant de vous engager. LEGENDE:

● Risque de blessure grave ou de mort
● Utilisation approuvée
● Risque d'accident ou de mort
● Examen requis

NOTICE D'UTILISATION HANDSCHLAUFEN

Les drappons Android, Lockdown et Slider offrent une résistance de 2 kN et sont conçus pour sécuriser le piéton au poignet uniquement.

Les drappons Slinger et Spinner sont conçus uniquement pour éviter de perdre un piéton durant la progression et ne supportent pas le poids du corps.

Avertissement : En cas de force de choc, votre dragonne n'est pas dynamique. Même une petite chute sur une dragonne peut vous blesser et provoquer la rupture de votre dragonne ou de votre amarrage avec pour conséquence des blessures graves ou la mort. (Voir les illustrations jointes)
