You are responsible for your own actions and decisions. Minors and others not able to assume this responsibility person. Before using this product, read and understand all instructions and warnings that accompany it and familiarize yourself with its proper use, capabilities and limitations. Seek qualified instruction. Contact Black Diamond if you are uncertain about how to use this product. Do not modify this product in any way. Failure to read and follow these warnings can result in severe injury or death.

KEY:
? Risk of serious injury or death
! Risk of accident or injury
! Instructions for future use

This product is designed for use and some common misuses for the climbing equipment depicted in the illustrations. Other possible misuses exist. Correct equipment use and the use of redundant systems will reduce some of the risks associated with climbing. If you lack experience, use this equipment under proper supervision. Always consider how a rescue might be carried out in case of an emergency or in the event of an accident.

This Type C sit harness is intended to provide protection against falls while climbing or mountaineering. It is intended for a conscious body in a sitting position.

SIZING PRECAUTIONS

1. It is essential that you wear the correct harness size and that it fits you well. Before using your harness, hang it from a safe place to ensure you've got the size designation and circumference range (in centimeters) and in inches of Black Diamond harnesses are located on the RN label on the harness's waist belt. 2. If you are uncertain whether your harness fits you correctly, consult with a qualified climbing instructor.

3. Check the buckles and adjustment regularly during use.

CARE AND MAINTENANCE

The harness material does not come into contact with corrosive materials such as battery acid, battery fumes, solvents, chlorine bleach, antifreeze, isopropyl alcohol or gasoline.

After contact with saltwater or salt air, always rinse and dry textile products, and rinse, dry and lubricate metal products.

(See accompanying illustrations)

RECOMMENDED USE AND RETIREMENT

Consider this harness does not have a lifetime. Inspect your gear before and after each use, and retire it when it fails inspection or when it reaches its maximum lifespan: 10 years after the date of manufacture, even if unused and properly stored.

See the accompanying illustrations. Retire your gear immediately if any of the illustrated conditions are found.

• If you have any doubt about the dependency of your gear, or after a serious fall, inspect your gear again.

• If you suspect damage during use.

• If you have any doubt about the dependency of your gear, or after a serious fall, inspect your gear again.

• Retired gear should be destroyed to prevent future use.

In the event that your harness needs to be disposed of, we recommend that you retire it rather than expose it to harsh chemicals.

• Refer to Markets Section of these instructions in order to determine the date of manufacture of this equipment.

• The insulation of gear is measured from the date of manufacture, not the date of sale.

(See accompanying illustrations)
